## Benefits

- Continually refreshes data to provide real-time reporting
- Customisable reports that meet your requirements
- Speeds up repair processes and shorten lead times
- Improved visibility of maintenance performance through dashboards and reports
- Configurable secure access

**MiDisplay application is designed to present key performance information to any browser on any PC / display, any time. Maintenance teams can benefit from real-time reporting of asset performance by being actively alerted to issues as they arise, speeding up repair processes and shorten lead times.**

### Key Benefits and Features:

#### Easy to use

MiDisplay is an easy to use, fully customisable application and designed in a familiar format. The application is made available through a secure single access point, which can be tailored to filter performance data specific for each individual stations requirements. This allows cross station and departmental analysis - improving the visibility of maintenance performance.

#### No restriction on the number of databases

MiDisplay is a SQL database reporting tool which has the flexibility to report on any information held across internal data systems. There is no restriction to the number of SQL databases used, allowing the presentation of key performance indicators from multiple databases.

#### Real-time Customisable Screen Alerts

MiDisplay continuously refreshes data and uses screen designs based on Red, Amber, Green reporting, giving an instant indication on the status of work. Users can see the priority of work orders on a daily basis; identify any subsequent actions to be created which, in-turn speeds up repair processes and shorten lead times.

## STATION WORK ORDER STATS

Station	After Use	Acceptance	Weekly	Scheduled Tests	Scheduled Tests Completed On time	Scheduled Maintenance	Scheduled Maintenance Completed On time	Defect	Defects Completed On time
Hogsmeade	25	87	1244	169	70.41 %	24	0.00 %	30	43.33 %
Kings Landing	61	120	1184	214	53.74 %	38	2.63 %	43	72.09 %
Mordor	47	56	1450	243	42.39 %	36	0.00 %	21	52.38 %
Rainton Bridge	9	30	966	130	24.62 %	24	4.17 %	6	83.33 %
Royston Vasey	31	87	1174	519	70.33 %	31	3.23 %	27	62.96 %
South Park	181	159	1123	164	52.44 %	35	5.71 %	45	66.67 %
Springfield	3	38	1047	116	83.62 %	19	5.26 %	15	46.67 %
Stepford	0	27	837	135	14.07 %	21	0.00 %	9	33.33 %

### Configurable and Customisable Reports

MiDisplay presents multiple report data sets, through a single access point. Each view can be tailored to filter data specifically to each individual users requirement, allowing them to focus on the important performance information specific to their needs to help speed up repair processes and shorten lead times.

### Improving maintenance teams productivity

MiDisplay can be used to present any data, from any database on your network. For example, users can use the application to display Progress of Defects; Missing assets at a station and Critical Non Conformances - allowing your departments to react to current data and reduce missed SLA's.

### Systems Service and Support

Miquest by Idhammar Systems can provide any level of implementation from complete Project Management to a supporting role in a large project team. We understand that each implementation and each customer are different so a full project scoping exercise is carried out at the start of every project.

Spreading the cost of an implementation can help with any project and we are able to offer the opportunity to lease the complete cost or just elements of the implementation so costs can be spread over a number of year's ensuring budgets are not compromised.

Support is provided every step of the way by our experienced UK based team of experts in consultancy, implementation, training and support to help our customers achieve operational excellence through improved uptime, better productivity, greater return on assets and less waste.
